

FISCHER AUTOMATION

SEW PERFECTLY - AUTOMATICALLY

F **A**

FLATSEAMER WITH TWO-COLOR COVERING THREAD

FISCHER AUTOMATION's four-needle flatseamer is a feed-off-the-arm flat-seam machine for processing knitted goods with high demands in terms of seam quality and tear resistance of the seams.

The solution

The fine, regular seam withstands the high strength requirements of products such as sports clothing and medical textiles. In addition, the two-color coverstitching facilitates attractive seam effects with two different thread colors or luminous/reflective threads. The flatseamer is available in models suited to butted seams as well as cutting on one side or both sides.

The benefits

The sewing machine is manufactured in consultation with the customer and according to use. The basic machine is procured from renowned manufacturers.

The height-adjustable stand provides substantially improved ergonomics for the operator.

FISCHER AUTOMATION GmbH

FISCHER AUTOMATION is set apart by over 60 years of experience in providing automation solutions to the sewing and textile industries. The company develops and produces custom high-quality industrial sewing equipment for a wide variety of applications. Uses range from the processing of medical and technical textiles to clothing and even home textiles.

For sewing processes, the optimal industrial sewing machine is selected for each application, irrespective of manufacturer, and is then adapted to requirements and delivered worldwide. The company works with well-known manufacturers, such as Kansai, Brother, Yamato, Juki, UnionSpecial, Pegasus, Pfaff, Megasew, and many others. This allows FISCHER AUTOMATION to provide cost conscious, high quality and innovative solutions that enable its customers to "Sew perfectly – automatically".

FISCHER AUTOMATION is a highly competent company with many years of experience in the manufacture of customized systems and machines in the areas of textile cutting and separation technology as well as in the automation of packaging and labeling processes.

Investments in technology, production facilities, and research and development, as well as collaboration with universities and research institutions, are essential growth factors for the FISCHER AUTOMATION team.
