

Solutions

We produce automation solutions for the sewing and textile industry, industrial sewing machines and sewing systems, textile cutting and separation technology, and automation of packaging and labeling processes as well as embroidery machines and technical embroidery technology. The areas of application range from the processing of medical and technical textiles to the sewing of clothing and household textiles.

We produce cost-conscious, high-quality, innovative solutions. This pays off for customers around the globe:

- „Made in Germany” quality
- Modular system solutions that can be flexibly combined with each other and easily adapted to different products
- Time savings resulting from the flexibility of the machines
- Time- and cost-optimized service, maintenance, and personnel training resulting from the use of proven standard components from well-known manufacturers
